

Cup tray made of plastic corks

Matīss Toms Vārna

What do you need?

- A few plastic corks
- An iron
- Baking sheet

STEP 1

- ▶ Cut the paper so it fully covers all of the corks from the bottom and also from the top.

STEP 2

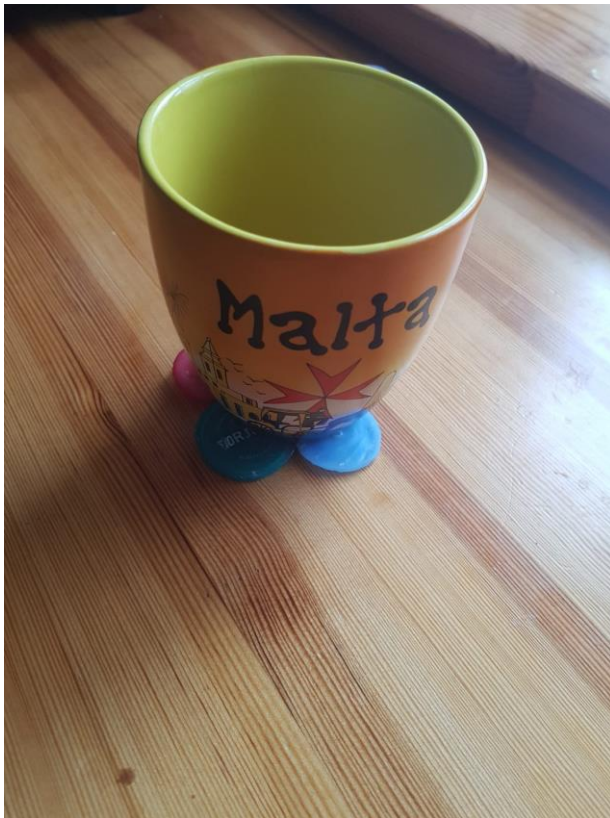

- ▶ Cross over the corks with an iron so they melt and remain flat

STEP 3

- ▶ Take the corks off the paper

STEP 4

- ▶ If you have a lot of redundant plastic corks, make new cup treys and use them in real life.

Conclusion

- ▶ This is very easy, eco-friendly DIY idea or to make in less than 5 minutes.
- ▶ I tried to make these cup trays 2 times, because the first time as I took it off from the paper, it broke down.
- ▶ I recommend not to buy cup trays from local shop, but to make it by yourself.
